Index for Volume 11 (1962)

ALEXANDER, R. D. The role of behavioral study in cricket classification (Symposium: The data of classification) 53

AXTELL, R. W. Can we use biotic provinces? 93

BLACKWELDER, R. E. Introduction to Symposium: The data of classification 49

BLAIR, W. FRANK. Non-morphological data in anuran classification (Symposium: The data of classification) 72

BOUDREAUX, H. BRUCE. Reproductive data in classification (Symposium: The data of classification) 145

BRADLEY, J. CHESTER. Difficulty arising from compulsory application of the law of priority to family-group names, with proposed amendments 178

COOK, L. M. Evolution of the scarlet tiger moth in northern Italy 17

COWAN, I. MCT., and P. A. JOHNSON. Blood serum protein variations at the species and subspecies level in deer of the genus *Odocoileus* 131

DOWNEY, J. C. Host-plant relations as data for butterfly classification (Symposium: The data of classification) 150

EDMUNDS, G. F. The principles applied in determining the hierarchic level of the higher categories of Ephemeroptera 22

EDWARDS, J. GORDON. Morphological statistics versus biology 142

GURNEY, A. B. What of taxonomy in 1970? 92

HAAS, OTTO. Comment on numerical taxonomy 186

HECHT, MAX K. A reevaluation of the early history of the frogs. Part I 39

HILDEBRAND, MILTON. The terminology of structural and functional similarities .. 186

INGER, R. F., and H. MARX. Variation of hemipenis and cloaca in the colubrid snake *Calamaria lumbricoides* 32

KIRIAKOFF, SERGIUS, G. On the Neo-Adansonian school 180

KOHN, A. J., and G. H. ORIANS. Ecological data in the classification of closely related species (Symposium: The data of classification) 119

LIDICKER, W. Z., JR. The nature of subspecies boundaries in a desert rodent and its implications for subspecies taxonomy 160

LOM, J., and J. VÁVRA. A proposal to the classification of the subphylum Cnidospora 172

NICOL, DAVID. The Arthropoda, the dominant phylum since the Cambrian period 176

RAUP, DAVID M. Crystallographic data in echinoderm classification (Symposium: The data of classification) 97

ROHLF, F. J., and R. SOKAL. The description of taxonomic relationships by factor analysis 1

SIBLEY, CHARLES D. The comparative morphology of protein molecules as data for classification (Symposium: The data of classification) 108

SMITH, HOBART M. Classification of structural and functional similarities in biology 45

SMITH, HOBART M. Commentary on the 1961 Code of Zoological Nomenclature ... 85

SMITH, HOBART M. The hierarchy of nomenclatural status of generic and specific names in zoological taxonomy 139

STAINS, HOWARD J. Osteological data used in mammal classification (Symposium: The data of classification) 127
